

# Disease State Management Program

**FOR MORE INFORMATION, PLEASE CONTACT:**

## Informing members to promote a better understanding of treatment decisions

The Amwins Rx Disease State Management Program facilitates a patient-centered communication style between members and their primary points of contact – healthcare providers, pharmacists, nurses, dieticians, etc. Our approach focuses on health literacy and addresses language and cultural barriers.

This program promotes treatment decisions that take the following considerations into account:

- Evidence based guidelines
- Prognoses/comorbidities
- Member preferences

### Premiums

The Amwins Rx Disease State Management Program provides members with a plan for when their symptoms worsen that includes access to trained personnel during a crisis or emergency to help avoid unnecessary Emergency Room visits.

This program is not limited to a few therapies. Our team assists members whether they have one disease state or are comorbid. Below is an overview of covered disease states.

### Covered Disease States Include

Asthma	Hypertension	Stroke
COPD	GERD	Transitions of Care
Diabetes	Oncology	Dementia
Heart Failure	Smoking Cessation	Pregnancy
Coronary Arterial	Chronic Kidney	Joint Replacement
Mental Health	HIV	Obesity
Substance Abuse	Pediatrics	Organ Transplant
Low Back Pain	Catastrophic Illness
