

**FOR MORE
INFORMATION,
PLEASE CONTACT:**

Prior to marketing, the FDA requires that new prescription drugs be shown to be safe and effective for their intended use. However, there are some older medications being prescribed today that never went through rigorous testing for safety, efficacy and quality.

These medications have been in use prior to the existence of FDA drug safety and efficacy testing protocols. They are termed non-FDA approved (or unapproved).

Amwins Rx excludes coverage of these medications to enhance patient safety which may result in net savings to the plan.

Examples of excluded (Non-FDA approved) medications

- Anusol HC
- Hyoscyamine
- PreviDent
- Anucort-HC
- K-Effervescent
- Pyridium
- Denta 5000 Plus
- Phenobarbital
- Urea Cream 40%
- Durachol Cap
- Phenazopyridine
- Urised
