

Patient Assistance Program Member Advocacy

Amwins Rx understands that it is not always easy to afford your medication copays under the prescription benefit, even when using a prescription coupon card. Brand and specialty medication prescribing for acute conditions are on the rise and can cost thousands of dollars. To help save you money, your health plan has elected Amwins Rx Patient Assistance Program. Our team of Program Coordinators work with you and your doctor to have qualifying medications supplied directly by the manufacturer at no charge - **yes, even the copay is waived!**

How does the program work?

When you are on a medication that is eligible for the program, an Amwins Rx Program Coordinator will contact you to discuss the savings opportunity and obtain your consent to member advocacy. They will then work with you in completing the application process with the drug's manufacturer and your doctor to see if you are eligible for free drug. Once approved by the manufacturer's assistance program, you'll receive the medication at no charge.

Eligible Medications

Not all medications qualify for the program and not all members are eligible for free drug from the manufacturer. Some manufacturer programs require additional household financial information. Below is a listing of some drugs eligible for the program.

- Eliquis
- Lantus
- Trulicity
- Enbrel
- Takhyzro
- Ultomaris
- Humalog
- Taltz
- Victoza
- Jardiance
- Toujeo
- Xarelto

Our team of Program Coordinators are here to assist you and look forward to speaking with you today. Please call 800-869-8759 to see how you can start saving money on your covered prescriptions!
